**Contact our Business Bankers
to help discuss your best
financing options.**

- Term or Equipment Loans - allows you to finance purchases of items such as equipment or machinery for a fixed term with regular payments.
- Real Estate Loans - longer term loans that are typically amortized up to 20 years with a balloon of 3-5 years and secured by real estate.
- Lines of Credit - flexible and allows you to manage your businesses cash flow as you see fit. You pay interest only on the portion you have borrowed and the funds can be used for things like inventory or accounts receivable management.
- Small Business Administration (SBA) Loans - government backed loans that we help you secure. The SBA guarantees a portion of the total loan. They can be used for multiple purposes including working capital, furniture and fixtures. In order to secure this loan type you need a business plan, equity and ability to repay.
